

# WLM-SENSOR

## Liquid Level Maintainer

U.S. PATENT NO. 6,848,483

The WLM-Sensor maintains the liquid in a container to a specified level without the use of electricity. Only a pressurized supply source is needed.

Water is the typical application, but other liquids can be controlled as well. The liquid level can be maintained to within 1/2" of the desired height.

### SPECIFICATIONS

Flow Rate (Water) = 4 Gallons/Hour with a Supply Pressure of 20 Psi.

*Note: Airtrol's WLM-Regulator can be attached to a standard 3/4" Hose Thread to Supply 20 Psi.*

### ORDERING INFORMATION

Part Number: **WLM-Sensor-10** = Sensor supplied complete with 10" long Pilot Tubing and Pilot Housing
